- **Analyst relations & market leadership:** Built and scaled Workvivo's analyst relations program, supporting stronger placements across Gartner, Forrester and ClearBox and wider research coverage. - **Category strategy & market intelligence:** Advise executive leadership on market shifts, competitive threats and emerging opportunities, helping shape product strategy, category positioning and future growth priorities.
- **Competitive intelligence program:** Replaced Klue with Steve AI, an agentic intelligence system connected to seller tools. Reduced annual software costs by more than 60k while keeping competitive guidance current and accessible.
- **AI-powered PMM systems:** Designed a messaging-as-a-code system to make approved messaging and its evidence reusable. Completed an HQ Agent pilot connected to our sales enablement agent; also build and test AI agents and workflows firsthand.
- **Major GTM initiative:** Led migration positioning, competitive differentiation and seller enablement for Workplace from Meta, contributing to Workvivo's Forrester-recognised company-wide response.
